Re: Application Development & Support Specialist

Dear Hiring Manager,

I am writing to express my interest in the Application Development and Support Specialist position at PHD Solutions as advertised. As a soon-to-be graduate with a diploma in Computer Science from George Brown College, I am enthusiastic about applying my academic knowledge and hands-on experience in software design, development, and testing to contribute to your team.

During my tenure at XX Company in Toronto, I honed my skills in mobile development, working with various wireless technologies and deploying applications using Android Studio and React Native. This experience, coupled with my proficiency in Java, Spring, HTML, CSS, JavaScript, C#, React, Docker, MySQL, and Git, aligns well with the technical requirements of your role. Moreover, my ability to communicate effectively in both English and Arabic positions me well to interact with diverse teams and client stakeholders.

My academic accomplishments, including making the Dean's List at George Brown College, and my project experience, notably the development of a JavaFX application, have prepared me well for a role that requires strong problem-solving and critical-thinking skills. I am eager to bring my technical acumen, combined with a strong desire to learn and grow, to your team. Additionally, my experience in addressing bugs and implementing system improvements would be beneficial in managing and enhancing your web and mobile applications.

I am enthusiastic about the possibility of joining PHD Solutions and contributing to your team's success. Thank you for considering my application. I look forward to the opportunity to discuss how my skills and experiences align with the needs of your team.

Sincerely,

Ali Al Aoraebi
